HISTORY:

An ongoing creative effort with solid, continuous, sustainable growth.

MISSION & VISION:

Our mission is the development, implementation and support of enterprise solutions, creating conditions of **progress** and **extroversion** for our customers. For this reason, we invest in research and design of **advanced systems** which, combined to our high-quality services, ensure the maximum **efficiency** and **future-proof** nature of our solutions.

Our vision is to always be one step **ahead**, anticipating future market challenges and presenting **personalized experiences** and a **creative working environment** for our customers. For us, customer **trust** is an asset as well as a driving force.

PRODUCTS:

All products are continuously evolving to new, upgraded versions that integrate modern business practices, legal and fiscal developments and technological enhancements, ensuring the future-proof nature of the customers' investment and the sustainability of the resulting competitive advantages.

R&D Since the company's establishment, Entersoft's strategy has been focused on the design and production of original business software. Accordingly, the largest part of its investments has been consistently directed to the Research and Development department.

The excellent technical competence and endless talent of its members, their focus on developments concerning the company's target markets and the integration of **only tried and tested technologies** in its products, ensure the constant flow of new functionalities and solutions for its customers.

The daily challenges faced by **customers** constitute a **valuable source of knowledge** and experience for the enrichment and upgrade of products, as well as for ensuring the right direction of the proposed solutions.

ENTERSOFT BUSINESS SUITE

Entersoft Business Suite® a comprehensive and integrated business software suite for ERP, CRM, Retail, WMS, Mobile, E-Commerce and Business Intelligence applications, provides a competitive advantage for modern medium and large enterprises wishing to integrate innovation and high technology, in combination with an extroverted, progressive development strategy.

It includes role-based **business flows**, a multitude of ready best-practice scenarios, as well as **rich, essential information** using interactive Dashboards, Olaps and Graphs. Integrating multi-dimensional tools to analyse and combine the information handled by all subsystems, it enhances a company's effectiveness and competitiveness.

- Easy access to information any time, safely, **through any electronic media**.
- Simplicity, ease of use, techniques used to guide users along daily processes.
- Adaptability, gradual integration of new sections and subsystems, aiming at a **successful transition** to a modern, digital, efficient business model (Order-to-cash, Procure-to-pay).
- Complex, demanding functionalities with great depth, designed so as to be perceived by users as simple daily processes.
- Support of **any business organization** and structure (countries, companies, sectors, stores, partners).
- Easy parameter-based third-party integration, with safeguards and procedures that check the correctness and matching of data, in order to achieve maximum automation in communications, as well as synergies that contribute to saving resources.

All Entersoft Business Suite subsystems have been assessed very highly in the context of the acknowledged **international certification** "Mixed mode manufacturing ERP" by Technology Evaluation Centers (TEC), a specialized company that is a world leader in providing consulting services, research and business software assessment around the world.

ENTERSOFT EXPERT CLOUD ERP

Integrated next-generation cloud ERP, CRM, Retail, Mobile, e-Commerce, Business Intelligence.

It is addressed to dynamically growing SMEs investing in innovation.

Hosted on Windows Azure, without the need for additional IT infrastructure.

It combines the simplicity of a standardized software with the rich functionality of a modern, flexible ERP system.

It includes ready organizational models (best business practices) that **accelerates user integration** and the implementation of modern, **efficient workflows** in less organized companies, while its integrated information system greatly differentiates it from all other products in its category.

ENTERSOFT SCM 360

The Entersoft **SCM 360** suite offers a **comprehensive approach** to **Supply Chain management**, combining software, analytics, hardware, automations and services. Able to cover logistics projects of any size and complexity.

The 6 solutions, that make up the Entersoft SCM 360, focus on productivity and reduced operating costs:

aberon (a leading platform for the development of innovative, tailor-made logistics solutions, with clear processes, flexible, modular architecture and rich technological tools)

Entersoft WMS (technologically advanced, with functionalities that support decision-making while reducing the complexity of warehouse operations)

Inventory Planning (for forecasting future demand, automatic creation of a replenishment plan for the central warehouse, to avoid shortages and overstocking)

Store Replenishment (for smart replenishment to Retail Chain stores with a more optimal allocation of available stocks in the central warehouse)

Automations Suite (Pick by Light, Put to Light, Pick Cart, Multi Order Picker, Voice Picking, Vision Picking, Data Collector, Smart Conveyor, RFID)

Proof of Delivery (for the "last mile" of the supply chain with automation of the process of order delivery at driver/vehicle/route level, with real time progress monitoring through a web portal)

ENTERSOFT RETAIL

Entersoft Retail® is a contemporary, standalone software application specifically designed for the retail and franchise industry (with hybrid functionality, online and offline).

The system optimizes the store's processes (from supply chain management up to **customer experiences** and **loyalty enhancement**), while reducing administrative costs. Through an extremely adaptable and user-friendly environment, it supports **complex discount policies and promotions**, all means of collection, as well as the stores' **full commercial and logistics cycle**, while also providing a ready, rich, comprehensive set of sales analysis statistics.

ENTERSOFT CRM

Entersoft CRM® fulfils the needs of Sales, Marketing and Customer Service divisions, creating an ideal environment for rational organization, timely planning and total monitoring of customer-related activities, therefore enhancing the company's extroverted nature.

With increased simplicity and user friendliness, it uses specific techniques to guide users through their daily tasks, while providing nonsuch benefits:

- It manages, organises and clearly presents Business Intelligence information.
- It allows the company to plan and formulate **focused actions for communicating and promoting its products**, methodically leading it to growth, while differentiating it from competition.
- It optimizes the company's internal procedures.

At the same time, its full coordination with ERP offers an **incomparable advantage** for the total daily activities of the Marketing and Sales people, while providing Management with a single, reliable overview of the entire company.

ENTERSOFT MOBILE CRM/SFA

Entersoft Mobile CRM/SFA® Cross platform covers all typical activities of Sales executives (contacts, sales opportunities, planned visits, target achievement), providing rich interactive information on customers and sales. It also integrates field marketing functionality (stock counting, replenishment, competition data etc.), based on the company's merchandising policy.

Its implementation

- enhances productivity
- reduces idle time spent on the road
- reduces errors
- accelerates the sales cycle
- provides reliable real-time management information on the results of salesforce activities.

ENTERSOFT FIELD SERVICE

Entersoft Service® Cross platform complements Entersoft Service Management, providing technicians access to any required function through their own devices.

On-site task management, implementation of **charging rules** based on contracts (SLA), **spare parts** availability, automatic implementation of respective **commercial policy**, and access to the Knowledge Base for the **rapid resolution** of various issues are implemented promptly and easily using the executives' device. This enhances their effectiveness, ensures transparent invoicing processes and contributes to the prompt and targeted response to **customer needs**, thus increasing **customer satisfaction levels**.

ENTERSOFT MOBILE xVAN

Entersoft Mobile xVan® **Cross platform** is addressed to companies that sell their products and / or services to their final customers (B2B) through the process of portable invoicing (xVan)

- Support of all traditional processes included in the concept of mobile invoicing, returns and collections at the delivery point
- Targeted vehicle stock monitoring
- Utilization and implementation of itineraries on the back-office side
- Questionnaires, competitor reports and other merchandising activities by preconfigured processes
- Enhancement of the driver's role with an associated increase in efficiency.

ENTERSOFT BUSINESS EXCHANGE

Business eXchange Services are designed to automate the two-way data feed in the collaborative chains created in the digital world and free people and systems from mechanical, technical and the management of complex processes.

- **Electronic Invoicing.** It is the "digital bridge" between companies but also between companies and the state. It automates the issuing and sending of documents to traders and to the myDATA platform and facilitates their control through a digital portal.
- **Electronic Distributors Channel Management.** It electronically and automatically collects sales data from the end points of sale of dealers - wholesalers, providing a 360o view of sales throughout the distribution chain.
- **Electronic Data Interchange (EDI).** Automatic collection, control and "translation" of documents in the issuer's ERP and automated import directly into the recipient's ERP, without the need for unnecessary typing and correctness checks.

SERVICES:

Entersoft has formed a comprehensive, organized and effective service provision system to help its **customers** adopt and **exploit** its IT systems in the **best** possible way.

IMPLEMENTATION SERVICES

The main aim of Implementation Services is to parametrize applications to ensure that they cover the key needs of each customer. They are provided by specialized executives that possess the required experience, training and expertise, both in business processes as well as innovation and technical tools.

Implementation services involve installation, data transfer from legacy systems, customization of the available functionalities for specific needs, incremental development of functions that are not directly supported by the systems, third-party integration (based on the open-architecture technologies used for the development of Entersoft systems, as well as on international interoperability standards for applications - web services) and end-user training.

The project implementation methodology is based on parametrized operating models that have been integrated in the systems, utilizing the experience gained from the implementation of a number of projects in large and medium companies of various industries. It also contributes to the correct analysis and design of the particularities of each installation, using methods and safeguards that help achieve the **maximum match between the customer requirements and the final product.**

OPTIMIZATION SERVICES

The aim of optimization services is to continuously support customers to make optimal use of their systems, while monitoring their development progress and their changing needs.

- Continuous, real-time on-the-job training.
- Optimization and changes in business processes already-in-place, for increased efficiency.
- Exploitation of new functionality or add-ons in order to cover new business activities.

SUPPORT SERVICES

After the start of productive operation, continuous support services aim to achieve seamless, error-free system operation, which constitutes Entersoft's top strategy priority.

Support services are provided full-time, covering all user support needs in a highly responsive way, using various methods, such as electronic communication, telephone, remote or on-site support.

EDUCATION SERVICES

Organized and effective education services are offered both during the roll-out of the IT system, as well as after live operation, aiming to achieve and maintain a high knowledge level of executives (end users, key users, IT users), familiarize them with the system and allow them to exploit its **capabilities**.

Entersoft also offers **certification** services for competences acquired by executives, so that the latter can support the company's strategic choices.

Moreover, supporting the continuous training needs of partners and customers, Entersoft has created the **Entersoft e-Learning platform**, with a wide range of courses that include presentations, instructions, documentation, training videos, familiarization exercises and comprehension quizzes.

HIGH-QUALITY PARTNER NETWORK:

Entersoft's key priority is the **continuous investment** in a high-quality, competitive partner network that promotes, implements and supports its products to end customers. Partners are selected based on the **quality** of their work, the **organization** of their companies and their **know-how**. They are supported through a set of procedures involving continuous training, support and certification of their consultants, in order to ensure that they are capable of **providing comprehensive solutions**.

OUR PEOPLE:

Our people continuously provide **new ideas, technologies, products and services**, having received **high-quality** specialized training and scientific education from prominent educational institutes in Greece and abroad. Our company recognizes and awards their **talent**, building relationships of **long-term cooperation**, in an environment of security and fairness, with a focus on the same values. Our aim is to remain their **first choice**, supporting their professional development, as the company grows and fulfils its vision, based on their own efforts.

INTERNATIONAL CERTIFICATION:

Entersoft is the first and only Greek company – and among a small number in Central & Eastern Europe – whose software has been certified by TEC. Entersoft Business Suite has been proven able to dynamically compete at an international level on business software field, further highlighting the company's extroversion.

«It's not hard to see why Entersoft's customer are very satisfied with the company, its products and its services. Organizations looking for an ERP solution that competes with larger, big-name vendors, like Microsoft, Sage, SAP, and Oracle but at a better price should include Entersoft in their selection process.»

Ted Rohm, Senior ERP Analyst, TEC

CORPORATE RESPONSIBILITY:

Entersoft is an active member of society and the business community, with proven corporate ethics and responsibility. It has developed multi-dimensional social activities, both in its daily operations in a consistent and structured way before its **personnel**, **customers** and **partners**, and also through its choices to support society and **vulnerable groups**, as well as

the **environment**, through its cooperation and non-profit support of organizations active in such fields (Action Aid, WWF). It actively participates in educational programmes of undergraduate, postgraduate and PhD studies, as well as research and theses offering scientific and business knowledge. It also provides **free** software to a number of academic institutes, in order to enhance the capabilities of **new scientists** regarding modern IT systems.

INTERNATIONAL PRESENCE:

Entersoft has established subsidiaries in Bulgaria, Romania and a qualitatively expanded customer base in dozens of countries through high-level local support teams, actively seeking out the areas where its software will have the greatest impact, providing powerful and innovative solutions to ambitious enterprises.

Its extroversion policy in recent years, has led both large international organizations and Greek companies active abroad to trust Entersoft, using its solutions.
